## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 – 40 and 69 – 74 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The examiner contends that the specification, at the time the application was filed, would not have taught one skilled in the art how to make and/or use the full scope of the claimed invention without undue experimentation. In re Wright, 999 F.2d 1557, 1562, 27 USPQ2d 1510, 1513 (Fed. Cir. 1993).

The determination that “undue experimentation” would have been needed to make and use the claimed invention is based on multiple instances in the instant specification that provide very general and all inclusive language for the composition of claimed invention, including, but not limited to:

- Page 21, lines 27 – 29
- Page 28, lines 11 – 18
- Page 36, lines 24 – 26

Art Unit: 3761

Claims 1 – 40 and 69 – 74 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims merely setting forth physical characteristics desired in article, and not setting forth specific compositions which would meet such characteristics, are invalid as vague, indefinite, and functional since they cover any conceivable combination of ingredients either presently existing or which might be discovered in future and which would impart desired characteristics. Ex parte Slob (PO BdApp) 157 USPQ 172.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 40 and 69 – 74 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yang.

With reference to claims 1 – 40 and 69 – 74, Yang discloses an absorbent article comprising a core comprised of pulp (col. 4, lines 59 – 60) and is comprised of about 50% by weight of substantially homogenous superabsorbent material as set forth in col. 6, lines 43 – 44. The absorbent article is fully capable of being used as a night time diaper, a travel diaper and/or an extended use diaper.

As noted by the instant specification on page 37, lines 4 – 5, cellulose is the useful in the claimed invention and Yang discloses the use of cellulose. Based on the foregoing, one can reasonably assume that the absorbent article of Yang would inherently provide the claimed test characteristics if subjected to a procedure identical to that disclosed by applicant.

Alternatively, the examiner contends that the core of Yang includes a distribution index. The minimum and maximum values may be considered as any portion thereof meeting the claimed limitations and furthermore, the examiner contends that one of ordinary skill in the art would be motivated to adjust the values in order to determine the most effective product.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1 – 40 and 69 – 74 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3761

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
